Acceptance forms are available at each Distributor’s office.

Any application shall be made in Italy to the Distributors.

#### *Door-to-door selling*

The Notes may also be distributed by the Distributors through door-to-door selling by means of financial advisors authorized to make off-premises offers (*consulenti finanziari abilitati all’offerta fuori sede*) pursuant to Article 30 of the Italian Legislative Decree No. 58 of 24 February 1998, as amended

from time to time (the “**Italian Financial Services Act**”) from and including 20 April 2020 to and including 8 May 2020, subject to any early closing or extension of the Offer Period or cancellation of the Offer.

Distributors intending to distribute Notes through door-to-door selling (*fuori sede*) pursuant to article 30 of the Italian Financial Services Act will collect the acceptance forms – other than directly at their branches and offices – through advisors authorized to make off-premises offers (*consulenti finanziari abilitati all’offerta fuori sede*) pursuant to Article 31 of the Italian Financial Services Act.

Within such period investors may notify the Distributor of their withdrawal without payment of any charge or commission. In case the Notes are placed through recorded telephone orders, the investor may subscribe for the Notes after being identified using its identification codes and passwords. Subsequently, the

investor will be requested to declare, among other things, that the same investor has received and ascertained the offering documentation and the risk factors contained therein, providing all personal and financial data required for the request in the Acceptance Form. The Distributor, during the telephone call, will summarize to the investor the personal details and the 31 investor will then confirm the correctness of such details and will give the consent to the subscription of the Notes. After this confirmation the investor will complete its request of adherence to the offer. The Distributor, in case of recorded telephone orders, guarantees the Lead Manager the appropriateness and suitability of its telecommunication procedures.

<b>WHAT ARE THE KEY RISKS THAT ARE SPECIFIC TO THE ISSUER?</b>			
<b>Risks specific to the Issuer and the Guarantor (where applicable)</b>	<p><b>1. Risk factors relating to the Issuers' and the Mediobanca Group's financial situation.</b></p> <p><b>Liquidity Risk</b></p>		

Liquidity risk is the risk that the Issuer will be unable to meet its obligations as they fall due, because of its inability to obtain funding (*i.e.* funding liquidity risk) and/or because of its difficulties to sell assets without incurring in a capital loss due to the illiquid nature of the market (*i.e.* market liquidity risk).

The liquidity of the Issuer may be affected by (i) national and international markets' volatility; (ii) potential adverse developments of general economic, financial and other business conditions; (iii) circumstances making the Issuer temporarily unable to obtain access to capital markets by issuing debt instruments; and (iv) variations in the Issuer's creditworthiness – which may affect the aforementioned market liquidity risk. All the above circumstances may derive from factors – as market disruptions – which do not depend on the Issuer's will, but may adversely affect its liquidity profile.

As at the date hereof, the Liquidity Coverage Ratio (“**LCR**”) of the Issuer is equal to 143% (whereby the required regulatory threshold from 1 January 2018 shall be at least equal 100%) and the Net Stable Funding Ratio (“**NSFR**”) of the Issuer is equal to 107% (whereby the required regulatory threshold from 2021 shall be at least equal 100%). The LCR creates a liquidity buffer that allows the Issuer's continuity for a 30-days-period in the case of serious distressed situations; the NSFR detects the structural liquidity, ensuring that assets and liabilities have a structure based on maturities that is sustainable for the Issuer.

Despite the above and the continuous monitoring activities of the Issuer over its liquidity risk, the occurrence of particular events as the one described herein and/or potential changes in the markets, due to fluctuations in interest rates, exchange rates and currencies, stock market and commodities prices and credit spreads and/or other risks relating to the regulatory developments in the prudential requirements field, could lead to adverse effects on the activities and on the economic/financial position of the Issuer.

***Market volatility and difficult access to debt capital markets can adversely affect the Issuer's liquidity***

In the event that the extreme volatility and disruption experienced by international and domestic markets in recent months continue in the future, the Issuer's liquidity can be adversely affected. The Issuer's funding activity relies, for more than 20 per cent., on retail deposits with the Group company CheBanca!, on medium and long-term debt capital market issues offered to institutional investors and to the public. The placement to retail investors is made through public offerings (carried out by means of single banking networks – including that of Banco Posta – with exclusivity or through syndicated joined banking groups) and sold directly on the *Mercato Telematico delle Obbligazioni* managed by Borsa Italiana S.p.A. (MOT). Demand from institutional investors is met through public offerings on the Eurobond market and private placements of instruments tailored on the basis of the specific needs of the subscriber.

The volatility of the debt capital markets in Italy and abroad may impair the Issuer's ability to raise funding through fixed-income instruments and may affect its liquidity in the long term. In addition, the wider credit spreads that the markets are experiencing can affect the Issuer's aggregate cost of funding and have an impact on its financial results.

***Risks in connection with the exposure of the Group to Eurozone sovereign debt***

In carrying out its activities, the Group holds substantial volumes of public-sector bonds, including bonds issued by European countries. The Group's total exposure in this respect as at 30 June 2019 is set out in the tables A.1.2.a and A.1.2.b of Part E of the audited consolidated annual financial statements of Mediobanca as at and for the year ended 30 June 2019 incorporated by reference into the Base Prospectus. This could give rise to operational disruptions to the Group's business.

Furthermore, Mediobanca is affected by disruptions and volatility in the global financial markets. Market tensions might affect negatively the funding costs and economic outlook of some euro member countries. This, together with the risk that some countries (even if not very significant in

terms of gross domestic product) might leave the euro area, would adversely affect the Group's ability to fund its financial obligations at a competitive cost.

In particular, Mediobanca's credit ratings are potentially exposed to the risk of reductions in the sovereign credit rating of Italy. On the basis of the methodologies used by rating agencies, further downgrades of Italy's credit rating may have a potential knock-on effect on the credit rating of Italian issuers such as Mediobanca.

Thus, any negative developments in the Group's sovereign exposure could adversely affect its results of operations, business and financial condition.

***Risks connected to a potential rating downgrade***

The Issuer, while improving its ability to withstand a hypothetical default by the Republic of Italy, is still materially dependant on the potential fluctuations of the credit ratings of the Republic of Italy, due to its overall exposure to the Republic of Italy's sovereign debt. Downgrades or foreseen downgrades of the Republic of Italy may therefore adversely affect the Issuer's activities, economic/financial position, operating results and/or perspectives.

Mediobanca is rated by (i) S&P Global Ratings Europe Limited (formerly, Standard & Poor's Credit Market Services Italy S.r.l.) ("**S&P**"), (ii) Fitch Italia S.p.A. ("**Fitch**") and (iii) Moody's Investor Service Ltd. ("**Moody's**") which are established in the European Union and registered under Regulation (EC) No. 1060/2009 on credit rating agencies, (as amended) (the "**CRA Regulation**") as set out in the list of credit rating agencies registered in accordance with the CRA Regulation published on the website of the European Securities and Markets Authority pursuant to the CRA Regulation.

A downgrade of Mediobanca's rating (for whatever reason) might result in higher funding and refinancing costs for Mediobanca in the capital markets. In addition, a downgrade of Mediobanca's rating may limit Mediobanca's opportunities to extend mortgage loans and may have a particularly adverse effect on Mediobanca's image as a participant in the capital markets, as well as in the eyes of its clients. These factors may have an adverse effect on Mediobanca's financial condition and/or the results of its operations.

**2. Risk factors relating to the Issuers' activities and the market where the Issuers and the Group operate.**

***The Issuer's financial results are affected by changes in interest rates***

Fluctuations in interest rates in Italy and in the other markets in which the Mediobanca Group operates influence the Mediobanca Group's performance. The results of each Issuer's banking operations are affected by its management of interest rate sensitivity. Interest rate sensitivity refers to the relationship between changes in market interest rates and changes in net interest income. A mismatch of interest-earning assets and interest-bearing liabilities in any given period, which tends to accompany changes in interest rates, may have a material effect on the Issuer's financial condition or results of operations.

***The Issuer's financial results may be affected by market declines and volatility***

The results of the Issuer are affected by general economic, financial and other business conditions. During recessionary periods, there may be less demand for loan products and a greater number of the Issuer's customers may default on their loans or other obligations. Interest rate rises may also impact the demand for mortgages and other loan products. The risk arising from the impact of the economy and business climate on the credit quality of the Issuer's borrowers and counterparties, including sovereign states, can affect the overall credit quality and the recoverability of loans and amounts due from counterparties.

The Issuer is therefore exposed by its very nature to potential changes in the value of financial instruments, including securities issued by sovereign states, due to fluctuations in interest rates, exchange rates and currencies, stock market and commodities prices and credit spreads, and/or

	<p>other risks.</p> <p><b><i>Each of the Issuers is subject to credit and market risk. Current market conditions are unprecedented</i></b></p> <p>The credit and capital markets have been experiencing extreme volatility and disruption in recent months. To the extent that any of the instruments and strategies the Issuer uses to hedge or otherwise manage its exposure to credit or capital markets risk are not effective, the Issuer may not be able to mitigate effectively the Issuer's risk exposures in particular market environments or against particular types of risk. The Issuer's trading revenues and interest rate risk are dependent upon its ability to identify properly, and mark to market, changes in the value of financial instruments caused by changes in market prices or interest rates. The Issuer's financial results also depend upon how effectively the Issuer determines and assesses the cost of credit and manages its credit risk and market risk concentration. In addition, due to market fluctuations, weak economic conditions and/or a decline in stock and bond prices, trading volumes or liquidity, the Issuer's financial results may also be affected by a downturn in the revenues deriving from its margin interests, principal transactions, investment banking and securities trading fees and brokerage activities.</p> <p><b><i>Sustained market weakness and volatility may adversely affect the Issuer's investment banking and financial advisory revenues and subject the Issuer to risks of losses from clients and other counterparties</i></b></p> <p>The Issuer's investment banking revenues, in the form of financial advisory and debt and equity underwriting fees, are directly related to the number and size of the transactions in which the Issuer participates and may be impacted by continued or further credit market dislocations or sustained market downturns. Sustained market downturns or continued or further credit market dislocations and liquidity issues would also likely lead to a decline in the volume of capital market transactions that the Issuer executes for its clients and, therefore, to a decline in the revenues that it receives from commissions and spreads earned from the trades the Issuer executes for its clients. Further, to the extent that potential acquirers are unable to obtain adequate credit and financing on favorable terms, they may be unable or unwilling to consider or complete acquisition transactions, and as a result, the Issuer's merger and acquisition advisory practice would suffer.</p> <p>In addition, declines in the market value of securities can result in the failure of buyers and sellers of securities to fulfil their settlement obligations, and in the failure of the Issuer's clients to fulfil their credit obligations. During market downturns, the Issuer's counterparties in securities transactions may be less likely to complete transactions. Also, the Issuer often permits its clients to purchase securities on margin or, in other words, to borrow a portion of the purchase price from the Issuer and collateralize the loan with a set percentage of the securities. During steep declines in securities prices, the value of the collateral securing margin purchases may drop below the amount of the purchasers indebtedness. If the clients are unable to provide additional collateral for these loans, the Issuer may lose money on these margin transactions. In addition, particularly during market downturns, the Issuer may face additional expenses defending or pursuing claims or litigation related to counterparty or client defaults.</p> <p><b>3. Risk factors relating to the legal and regulatory framework</b></p> <p><b><i>Changes in the Italian and European regulatory framework could adversely affect the Issuer's business</i></b></p> <p>The Issuer is subject to extensive regulation and supervision by the Bank of Italy and the <i>Commissione Nazionale per le Società e la Borsa</i> (the Italian securities market regulator or "CONSOB") in relation to Mediobanca, the European Central Bank and the European System of Central Banks in relation to both Issuers and the CSSF in Luxembourg in relation to Mediobanca International.</p> <p>The banking laws to which the Issuer is subject govern the activities in which banks and</p>

foundations may engage and are designed to maintain the safety and soundness of banks, and limit their exposure to risk. In addition, the Issuer must comply with financial services laws that govern its marketing and selling practices. The regulatory framework governing the international financial markets is currently being amended in response to the credit crisis, and new legislation and regulations are being introduced in Italy and could significantly alter the Issuer's capital requirements.

The supervisory authorities mentioned above govern various aspects of the Issuer, which may include, among other things, liquidity levels and capital adequacy, the prevention and combating of money laundering, privacy protection, ensuring transparency and fairness in customer relations and registration and reporting obligations. In order to operate in compliance with these regulations, Mediobanca has in place specific procedures and internal policies. Despite the existence of these procedures and policies, there can be no assurance that violations of regulations will not occur, which could adversely affect the Group's results of operations, business and financial condition. The above risks are compounded by the fact that, as at the date hereof, certain laws and regulations have only been recently approved and the relevant implementation procedures are still in the process of being developed.

*The Bank Recovery and Resolution Package is intended to enable a range of actions to be taken in relation to credit institutions and investment firms considered to be at risk of failing. The implementation of the directive or the taking of any action under it could materially affect the value of any Notes*

Directive 2014/59/EU (the "**Bank Recovery and Resolution Directive**" or the "**BRRD**") as amended by Directive 2017/2399 (the "**BRRD Amending Directive**") and Directive 2019/879 (the "**BRRD II**" and, jointly with the BRRD and the BRRD Amending Directive, the "**BRRD Package**") provides for the establishment of an EU-wide framework for the recovery and resolution of credit institutions and investment firms. The BRRD has been implemented in Italy through the adoption of the Legislative Decrees No. 180/2015 of 16 November 2015 and 181/2015.

The BRRD Package contains four resolution tools and powers which may be used alone or in combination where the relevant resolution authority considers that: (a) an institution is failing or likely to fail, (b) there is no reasonable prospect that any alternative private sector measures would prevent the failure of such institution within a reasonable timeframe, and (c) a resolution action is in the public interest: (i) sale of business - which enables resolution authorities to direct the sale of the firm or the whole or part of its business on commercial terms; (ii) bridge institution - which enables resolution authorities to transfer all or part of the business of the firm to a "bridge institution" (an entity created for this purpose that is wholly or partially in public control); (iii) asset separation - which enables resolution authorities to transfer assets to one or more publicly owned asset management vehicles to allow them to be managed with a view to maximising their value through eventual sale or orderly wind-down (this can be used together with another resolution tool only); and (iv) bail-in - which gives resolution authorities the power to write down certain claims of unsecured creditors of a failing institution and to convert certain unsecured debt claims into shares or other instruments of ownership (i.e. shares, other instruments that confer ownership, instruments that are convertible into or give the right to acquire shares or other instruments of ownership, and instruments representing interests in shares or other instruments of ownership) (the "**General Bail-In Tool**"), which equity could also be subject to any future application of the General Bail-In Tool.

In addition to the General Bail-In Tool, the BRRD Package provides for resolution authorities to have the further power to permanently write-down or convert into equity capital instruments at the point of non-viability and before or concurrently with any other resolution action is taken ("**non-viability loss absorption**"). Any shares issued to holders of the Notes upon any such conversion into equity capital instruments may also be subject to any application of the General Bail-In Tool.

For the purposes of the application of any non-viability loss absorption measure, the point of non-viability under the BRRD Package is the point at which the relevant authority determines that the

institution and/or its group meets the conditions for resolution (but no resolution action has yet been taken) or that the institution and/or its group will no longer be viable unless the relevant capital instruments are written-down/converted or extraordinary public support is to be provided and the appropriate authority determines that without such support the institution would no longer be viable.

In the context of these resolution tools, the resolution authorities have the power to amend or alter the maturity of debt instruments and other eligible liabilities issued by an institution under resolution or amend the amount of interest payable under such instruments and other eligible liabilities, or the date on which the interest becomes payable, including by suspending payment for a temporary period, except for those secured liabilities which are subject to Article 44(2) of the BRRD.

Moreover, the European Commission has proposed a harmonised national insolvency ranking of unsecured debt instruments to facilitate credit institutions' issuance of such loss absorbing debt instruments, by creating, inter alia, a new asset class of "non-preferred" senior debt instruments with a lower rank than ordinary senior unsecured debt instruments in insolvency. In such perspective, the proposed amendments to Article 108 of the BRRD aim at enhancing the implementation of the bail-in tool and at facilitating the application of the "minimum requirement for own funds and eligible liabilities" ("**MREL**") requirement concerning the loss absorption and recapitalisation capacity of credit institutions and investment firms. As such, the amendments provide an additional means for credit institutions and certain other institutions to comply with the forthcoming MREL requirement and improve their resolvability, without constraining their respective funding strategies.

The powers set out in the BRRD Package and the application of the MREL requirement will impact credit institutions and investment firms and how they are managed as well as, in certain circumstances, the rights of creditors under the Programme and could, therefore, materially adversely affect the rights of holders of the Notes, the price or value of their investment in any Notes and/or the ability of the Issuer to satisfy its obligations under any Notes.

#### ***Risks related to changes in fiscal law***

The Issuer is subject to risks associated with changes in tax law or in the interpretation of tax law, changes in tax rates and consequences arising from non-compliance with procedures required by tax authorities. More in particular, the Issuer is required to pay Italian corporate income taxes ("**IRES**") pursuant to Title II of Italian Presidential Decree no. 917 of 22 December 1986 (i.e. the Consolidated Income Tax Law, or "**TUIR**") and the Italian regional business tax ("**IRAP**") pursuant to Legislative Decree no. 446 of 15 December 1997, and the amount of taxes due and payable by the Issuer may be affected by tax benefits from time to time available.

The Issuer currently benefits from the stimulus provisions introduced by way of article 1 of Italian Law Decree no. 201 of 6 December 2011, as amended and converted into Law no. 214 of 22 December 2011, concerning "economic-growth allowances" (*aiuto alla crescita economica*, or "**ACE**"). The ACE rules allow for a deduction from net income for the purposes of IRES of an amount computed by applying a notional yield (being 1.5% from 2018 onwards) to the increase in net equity (the "**ACE Base**"). The ACE base is, for the first year of application of ACE (i.e. 2011), the amount of equity existing at close of that year less the amount of equity as of 31 December 2010 (excluding profits earned in 2010) and, for subsequent years, the base carried forward from the previous year as adjusted (increased and reduced) to reflect components affecting equity.

In accordance with article 3 of the Italian Ministerial Decree of 3 August 2017 revising the implementing provisions of the ACE legislation, if the amount of the notional yield (i.e. the ACE deduction) exceeds net income declared for a given tax year (the "**Excess ACE**"), such excess (i) may increase the amount deductible from income in subsequent tax years, or (ii) may be converted into a tax credit calculated by applying the IRES tax rate, as per article 77 of the TUIR, to the Excess ACE amount and then utilised in five annual instalments of equal amount as an offset to IRAP up to the amount of tax due for the period. Following abrogation of ACE by the

Italian government, the Excess ACE that remained unutilised as of 31 December 2018 of Euro 5.4 million may be either carried forward or, with reference to the Excess ACE of the 2018 tax year only, transformed into tax credit to offset IRAP. Accordingly, the Issuer will no longer benefit from any tax deduction under the ACE mechanism once its Excess ACE has been utilised in full.

From time to time, the Italian budget law may also include provisions that affect the deductibility of particular items that could result in an increase in the taxable income of the Issuer for IRES and/or IRAP purposes, either in general or for specific tax period(s), for example the measures introduced by the 2019 budget law as regards the treatment of loss on loans to customers recognised on first application of IFRS 9.

Any legislative changes affecting the calculation of taxes could therefore have an impact on the Issuer's financial condition, results of operations and cash flow.

***Risk related to the effects of the IFRS 9 “first time adoption” and the forthcoming regulatory and accounting changes***

Following the entry into force and subsequent application of new accounting standards and/or regulatory rules and/or the amendment of existing standards and rules, the Issuer may have to revise the accounting and regulatory treatment of some operations and the related income and expense, with potentially negative effects on the estimates contained in the financial plans for future years and with the need to restate already published financial statements.

IFRS 9 has replaced IAS 39 and has introduced significant changes with regard to “Classification and Measurement” and “Impairment”, thus affecting the Issuer's net assets amount and composition during its “first time adoption” phase.

Whereby the changes regarding “Classification and Measurement” did not produce material effects on the Mediobanca's accounts, the changes regarding “Impairment” have implied an overall increase of the expected losses equal to Euro 118,000,000 – of which 67% refers to *in bonis* exposures and 33% to non-performing exposures.

For further information on the IFRS 9 implementation, please refer to sections headed “*Information on Mediobanca - Banca di Credito Finanziario S.p.A.*”, “*Financial Information of Mediobanca - Banca di Credito Finanziario S.p.A.*”, “*Information on Mediobanca International (Luxembourg) S.A.*” and “*Financial Information of Mediobanca International (Luxembourg) S.A.*”.

In addition to the substantial changes in accounting standards, there are several other initiatives, in various stages of finalisation, which represent additional regulatory pressure over the medium term and will impact the EU's future regulatory direction.

In this context, the Basel Committee on Banking Supervision (the “**BCBS**”) approved a number of capital adequacy and liquidity requirements (“**Basel III**”), which impose requirements for, *inter alia*, higher and better-quality capital, better risk coverage, measures to promote the build-up of capital that can be drawn down in periods of stress and the introduction of a leverage ratio as a backstop to the risk-based requirement as well as two global liquidity standards. The Basel III framework adopts a gradual approach, with the requirements to be implemented over time, with full enforcement in 2019. Moreover, the Basel Committee has embarked on a very significant risk weighted assets (“**RWAs**”) variability agenda. This includes the “Fundamental Review of the Trading Book”, revised standardised approaches (e.g., credit, market, operational risk), constraint to the use of internal models, as well as the introduction of a capital floor. The regulator's primary aim is to eliminate unwarranted levels of RWA variance. The new setup will have a significant impact on risk modelling. From a credit risk perspective, an impact is expected both on capital held against the exposures assessed via standardised approach and on those evaluated via an internal ratings based approach (“**IRB**”), due to the introduction of capital floors that, according to the new framework, will be calculated based on the revised standardised

	<p>approach. Implementation of these new rules on risk models will take effect from 1 January 2022.</p> <p>At the European level, the Basel III rules have been implemented through two separate legislative instruments: Directive 2013/36/EU of 26 June 2013, as amended (the "<b>CRD IV Directive</b>") and Regulation (EU) No. 575 of the European Parliament and of the Council of 26 June 2013 on prudential requirements for credit institutions and investment firms (the "<b>CRR</b>" and together with the CRD IV Directive, the "<b>CRD IV</b>").</p> <p>The CRD IV has been recently amended, as well as the BRRD and the SRM Regulation, following the adoption of a comprehensive reform package first announced by the European Commission in November 2016 (the "<b>EU Banking Reform</b>"). In particular, the EU Banking Reform consists of:</p> <ul style="list-style-type: none"> <li>• Directive (EU) 2019/878 of the European Parliament and of the Council of 20 May 2019 amending the CRD IV Directive as regards exempted entities, financial holding companies, mixed financial holding companies, remuneration, supervisory measures and powers and capital conservation measures (the "<b>CRD V</b>");</li> <li>• Regulation (EU) 2019/876 of the European Parliament and of the Council of 20 May 2019 amending the CRR as regards the leverage ratio, the net stable funding ratio, requirements for own funds and eligible liabilities, counterparty credit risk, market risk, exposures to central counterparties, exposures to collective investment undertakings, large exposures, reporting and disclosure requirements (the "<b>CRR II</b>");</li> <li>• Directive (EU) 2019/879 of the European Parliament and of the Council of 20 May 2019 amending the Bank Recovery and Resolution Directive as regards the loss-absorbing and recapitalisation capacity of credit institutions and investment firms and Directive 98/26/EC (the "<b>BRRD II</b>"); and</li> <li>• Regulation (EU) 2019/877 of the European Parliament and of the Council of 20 May 2019 amending Regulation (EU) No. 806/2014 as regards the loss absorbing and recapitalisation capacity of credit institutions and investment firms (the "<b>SRMR II</b>").</li> </ul> <p>These recently introduced banking reforms as well as other laws and regulations that may be adopted in the future could adversely affect the Issuer's business, financial condition, results of operations and cash flow.</p>

A number of these Notes may have features which contain particular risks for potential investors. These include the following:</p> <ul style="list-style-type: none"> <li>(i) The Notes may not be a suitable investment for all investors.</li> <li>(ii) Under EC Council Directive income 2011/16/EU on Administrative Cooperation in the field of Taxation (as amended by Council Directive 2014/107/EU), each EU Member State is required to provide by automatic exchange to the tax authorities of any other EU Member State information regarding taxable periods as from 1 January 2016 concerning Reportable Accounts held by a Reportable Person with a local Reporting Financial Institutions in which Notes may be held. **2. Risk related to the structure of a particular Issue of Notes**

- (i) In the event that the Issuer would be obliged to increase the amounts payable in respect of any Notes due to any withholding or deduction, the Issuer may redeem all outstanding Notes in accordance with the Terms and Conditions of the English Law Notes.
- (ii) If Mediobanca is declared insolvent and a winding up is initiated, it will be required to pay the holders of senior debt and meet its obligations to all its other creditors (including unsecured creditors) in full before it can make any payments on the Subordinated Notes. If this occurs, Mediobanca may not have enough assets remaining after these payments to pay amounts due under the Subordinated Notes.

**3. Risk Factors related to the Notes generally**

- (i) The Notes and any non-contractual obligations arising out of or in connection with them are governed by, and shall be construed in accordance with, English law. No assurance can be given as to the impact of any possible judicial decision or change to English law or administrative practice after the date hereof.

- (iv) In the event the Issuer decides to issue further Notes having the same terms and conditions as an already existing Series of Notes (or in all respects except for the Issue Price, the Issue Date and/or the first payment of interest) and so that the further Notes shall be consolidated and form a single series with the original Notes, the greater nominal amount in circulation could lead to greater liquidity in the secondary market with a consequent negative impact on the price of the relevant Series of the Notes.

**4. Risk Factors relating to the market generally**

- (i) Notes may have no established trading market when issued, and one may never develop. The Issuer has not any obligation to purchase the Notes from the Noteholders. However, should the Issuer decide to purchase the Notes, the secondary market pricing that the Issuer may provide on the Notes may reflect the unwinding cost of the hedging portfolio (if any).
- (ii) Investment in Fixed Rate Notes involves the risk that subsequent changes in market interest rates may adversely affect the value of the Fixed Rate Notes.
- (iii) One or more independent credit rating agencies may assign credit ratings to the Notes.

The Issuer may, but is not obliged to, list or admit Notes to trading on a stock exchange or market. The Issuer, or any of its Affiliates may, but is not obliged to, at any time purchase Notes at any price in the open market or by tender or private agreement.</p> <p>(vii) The Issuer shall use all reasonable endeavours to maintain listing on the multilateral trading facility EuroTLX, provided that if it becomes impracticable or unduly burdensome or unduly onerous to maintain such listing, then the Issuer may apply to de-list the relevant Notes, although in this case it will use all reasonable endeavours to obtain and maintain (as soon as reasonably practicable after the relevant de-listing) an alternative equivalent admission to listing, trading and/or quotation by a stock exchange, market or quotation system within or outside the European Union, as it may decide.</p>
